

# Job Order Contracting Federal

## An innovative support system for Federal Job Order Contracts

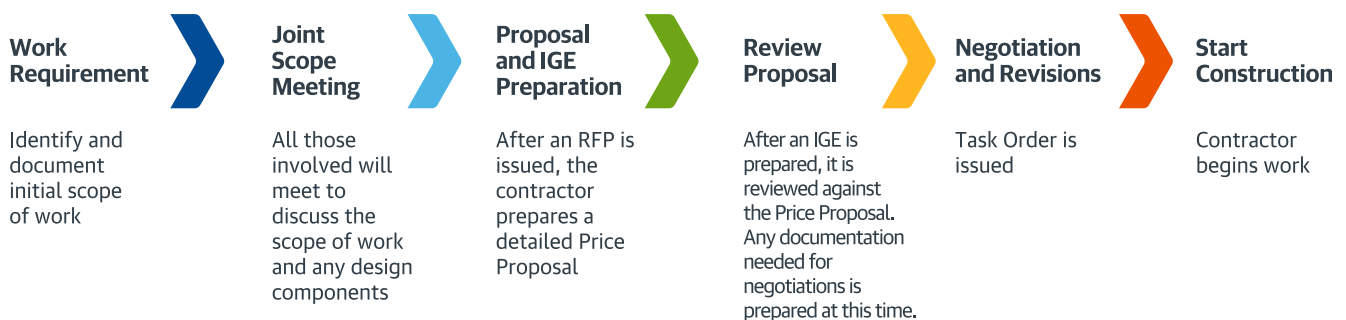

The Gordian Job Order Contracting Federal solution is designed specifically to meet the needs of Federal and DOD agencies implementing and managing IDIQ contracting programs like Job Order Contracting (JOC), SATOC or SABER.

This collaborative system supports Federal engineering, estimating, project management and contracting users with a procurement-specific version of our industry-standard RSMeans data. This unique data set, available only from Gordian, has been enhanced and expanded by RSMeans data engineers to provide more precise pricing and cost control.

The data is accessible through our web-based software platform and provides tools for core estimating, proposal creation, task order development and contract and program management with reporting.

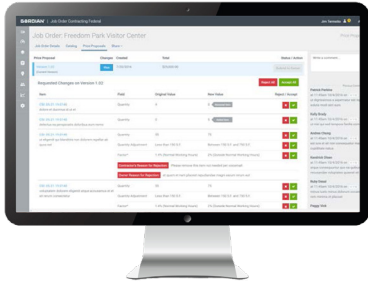

This unique combination of data and software is delivered with critical support activities like training and system setup to leverage Federal owner resources and skills, empowering critical support activities like acquisition advisement, training, and system configuration.

Job Order Contracting Federal provides an innovative solution to manage efficient, audit-worthy Job Order Contracting programs and address common IDIQ challenges.

### Benefits

- Accurate pricing and controls from industry-trusted RSMeans data that is enhanced and expanded to provide procurement-specific data
- Technology controls automatically validate pricing
- Automated estimate vs proposal comparison and review tools improve efficiencies
- Task order work flow, Federal Independent Government Estimate (IGE) process and owner-contractor collaboration throughout the proposal review and approval process is supported through secure, role-based software
- Option to integrate dynamic local Davis-Bacon wage rate

## Data

Job Order Contracting Federal leverages a procurement-specific version of our industry-standard RSMeans data. This RSMeans data Construction Procurement Catalog has been enhanced with more robust descriptions, notes and modifiers to give the ultimate level of precision needed. In addition, prices are localized and Davis-Bacon wage rates can be integrated. Unlike estimating or manual data systems, more precise data provides better pricing control and reduces negotiation time and effort.

## Software

The Job Order Contracting Federal software allows you to quickly compile an accurate and detailed price proposal based on the RSMeans data Construction Procurement Catalog. The system supports collaborative scope development and refinement to maximize the value of projects to the government. The system is also designed to support Federal IGE preparation, and securely automates the pricing comparison process to streamline and facilitate negotiations. The result is reduced staff effort, reduced cycle time, and increased execution throughput. This fully automated system makes managing a Job Order Contracting program easier than ever before.

## Expertise

Our experienced engineers, consultants and construction experts will ensure your Job Order Contracting program is implemented correctly by assisting with program development, training, as well as software configuration and the development of a localized dataset. You'll also have technical support to ensure an efficient and successful program.

## About RSMeans data

For more than 75 years, RSMeans data has been North America's leading source for construction cost estimating information. Construction professionals everywhere depend upon this quality cost data to estimate with confidence, save time, improve decision-making and increase profits. Gordian invests over 22,000 hours annually, leveraging our staff's extensive experience in construction cost data and research.

## About Gordian

Gordian is the world's leading provider of facility and construction cost data, software and services for all phases of the building lifecycle. A pioneer of Job Order Contracting (JOC), Gordian's solutions also include our proprietary RSMeans data and Sightlines facility benchmarking and analysis. From planning to design, procurement, construction and operations, Gordian's solutions help clients maximize efficiency, optimize cost savings and increase building quality.
